FOR PORTSMOUTH

PORTSMOUTH'S INTERESTS.

You want local news? Read the Herald. More local news than all other local publications combined. Try it.

WEDNESDAY, APRIL 5, 1899.

"Billy" Bryan has stirred up a regular hornet's nest and the local disciples of the silver god appear to be rather quiet. Come "Colonel," stir 'em up a little.

Col. Quay's desperate effort to have himself re-elected to the senate is generally recognized as one of the greatest labor movements ever known in Pennsylvania.

Several of Spain's most accomplished naval experts take strong exception to Admiral Dewey's method of conducting a campaign. And all things considered, we don't blame them.

Marconi, the Italian inventor, may succeed, and in fact has to some extent succeeded already, in telegraphing without wires. But he will never be able to run a political convention without them.

There is further talk about making Richard Olney, of Massachusetts, the democratic nominee for president, but no such thing will happen. Mr. Olney is an intellectual plutocrat, and the democracy, consequently, has no use for him.

The individual who writes the idiotic stuff for the Manchester Union, regarding President McKinley's policy in the Philippines, and pictures Uncle Sam's failure to cope with Aguinaldo, must have been reared in Massachusetts in the same town with Senator Hoar.

Admiral Kautz, commander of the cruiser Philadelphia, now in Samoan waters, bears a German name, but his principles, like his guns, are distinctly American. He isn't hunting for trouble in that part of the world, but if there is any he will be on hand when it happens.

Admiral Dewey has written home to deny the report that he carried Aguinaldo from Hong Kong to Manila when he went there to smash the Spaniards, but the denial was scarcely necessary. His first statement as to that question was definite and nobody but small-souled carpers has ever doubted it.

Coin Harvey, having given up the job of collector of campaign funds for Col. Bryan's national democratic committee, is now at liberty to write another book to prove that a one-hundred-cent dollar can be made from forty-six cents' worth of silver. Fiction, rather than business, is Harvey's stronghold.

Inasmuch as Hon. Bourke Cockran has gone to Europe, he will probably take his Jefferson dinner in London. The absence of this distinguished orator from the ten dollar banquet of the democratic club, will doubtless fill Mr. Croker's heart with six or eight distinct and separate varieties of emotion.

A Way Some Men Have.
 "Old chap," said the man who has conscientious scruples against buying his own cigars, "got a smoker handy?"
 "No, I'm not smoking in Lent."
 "Well, well! Too bad! Say, I guess I'll swear off myself till you begin again."—Detroit Free Press.

APT QUOTATIONS.

Proverbs, axioms and wise sayings have been uttered by Confucius and other wise men from time immemorial, but few people realize how many there are of them. C. I. Hood & Co., of Sarapville, Pa., have over two thousand and they have originated the innumerable plan of serving them up in desirable shape in thousands of newspapers, with each one neatly turning a point as to the merit of their well known motto. The extensive use of these quotations is original and creditable to Hood & Co.

Any man makes a lazy man. Der-
 mott's motto is the natural, never
 failing remedy for a lazy liver.

FROM MANILA.

The Insurgents In Force Near Calumpit.

Residents of Malolos Think Aguinaldo's Bubble Has Burst.

The Americans Found Two Krupp Guns and 27,000 Silver Dollars at Malolos.

MANILA, April 5.—The insurgents are massing strong forces north of Calumpit, about five and one half miles northwest of Malolos, and according to the observations of reconnoitering parties, they have fine entrenchments there. It is expected that hard fighting will be necessary to dislodge them at this point and at San Fernando, where Aguinaldo is supposed to be. The Montana regiment had one man killed and three wounded yesterday. Twenty-five men were prostrated by heat and brought to the hospital. Two large new Krupp guns were found buried at Malolos. Though secured late they will be mounted. The Americans have also found 27,000 silver dollars. The belief is spreading among the residents here that the effect of the capture of Malolos, followed by the proclamation of the Philippine commission, will be to convince the natives that Aguinaldo's bubble has burst. The Philippines were of the opinion that the Red Cross flag was the American battle flag.

MANILA, April 4.—General McArthur reconnoitered in force this morning with the Montana regiment, the Fourth cavalry and two guns of the light artillery as far as the river beyond Malolos. The reconnoissance developed the fact that fully 1000 rebels, armed and preparing for defence, held the line of the river. Shots were exchanged and two of the Montana men were wounded, but there was no engagement. Later in the day General McArthur moved northward, as the water supply of Malolos is inadequate.

SWEDISH WRECKING COMPANY BACKS OUT.

WASHINGTON, April 4.—Acting Secretary of the Navy Allen has received a letter from the manager of the Neptune company, the great Swedish wrecking corporation, announcing that it is not possible to raise and repair the vessels of Cervera's fleet, sunk near Santiago. Their conclusion is that in the case of the Cristobal Colon the company can not undertake to raise her unless the United States government guarantees expenses in event of failure. The wreck lies in the surf. The company feels that while it is entirely feasible to float the Vizeaya, she would probably not be worth enough to the United States government to warrant the expenditure. The Swedish company, having thus withdrawn, the navy department is free to entertain any other project that may be advanced for raising any of the Spanish ships. There is already pending a tentative proposition from a native corporation, which has volunteered to deposit a bond of \$40,000,000 to guarantee the successful prosecution of the work, and other more or less formal propositions have been advanced.

CUBAN ASSEMBLY DISSOLVES.

HAVANA, April 4.—The Cuban military assembly this afternoon voted to disband the army and dissolve. The voting was twenty-one in favor to one opposed. The muster rolls of the army were left in possession of the executive committee of the assembly, who will facilitate the preparation of copies for Governor General Brooke.

CARTER H. HARRISON WINS.

CHICAGO, April 4.—Carter H. Harrison was elected mayor of Chicago today by a total vote of 146,914, against 107,384 for Z. R. Carter, the republican candidate, and 45,401 for John P. Altgeld, the independent democratic candidate, Harrison's plurality being 39,610.

SECRETARY LONG RETURNS.

WASHINGTON, April 4.—Secretary of the Navy John D. Long returned to Washington tonight from his inspection tour at Newport News, Norfolk and Richmond. He is much pleased with the progress of the work on the government vessels.

STEAMER CAPSIZED.

PORTLAND, Me., April 4.—The steamer

ALL RUN DOWN IN SPRING.

"Till, Like a Clock Worn Out With Keeping Time, The Wheels of Weary Life at Last Stand Still."

The wheels of weary life indeed seem to stand still with you because you are sick, out of health, exhausted in nerve force and physical strength. Your blood is poor, your nerves are weak, your head aches, you are weak, tired, without strength, energy or ambition, you do not sleep well at night and wake tired and out of sorts mornings. Your food does you no good, you feel dispirited, blue, discouraged and indescribably miserable. Spring debility aggravates your troubles. Your case is only one like thousands that are cured every day by that greatest known restorative of health, Dr. Greene's Nervura blood and nerve remedy. Take this wonderful remedy at once and it will make you well. It feeds, strengthens and vitalizes the nerves, purifies and enriches the blood, restores appetite and digestion, in fact is the only remedy in the world which is absolutely sure to make you well and strong. It is purely vegetable and perfectly harmless.

Mrs. Ellen Simpson, 72 Linden St., New Bedford, Mass., says:
 "My daughter, Jennie, had been in feeble health for about two years and for six months had been unable to walk upon the street. Her weakness seemed to proceed from a stomach trouble, and for a long time she had been unable to take other than liquid food. Her condition was such as to give me and my friends great uneasiness. Physicians who were consulted gave no relief and her condition was rapidly growing worse. She had no appetite for food, passed many sleepless nights and required a great deal of attention and care. She finally heard of the wonderful efficacy of Dr. Greene's Nervura blood and nerve remedy in relieving disorders of the stomach and the general system, and almost in despair decided to give it a trial. She began taking it and the effect was what the family had desired but scarcely dared hope for. In the spring her strength was much increased and her general condition improved. She has gained in strength, was able to eat solid food, her nights were peaceful and restful and her confidence in Dr. Greene's Nervura so great that she decided to continue its use. She believes that had she earlier begun the use of Nervura she would have fully recovered long before, as she noted the effects day by day, but having delayed until the ailment became chronic, a much longer course of treatment was necessary."

Remember that in using Dr. Greene's Nervura blood and nerve remedy you are under the professional treatment of Dr. Greene, 34 Temple Place, Boston, Mass., the most successful physician in curing all forms of nervous, chronic and lingering complaints, and that you can consult him at any time about your case, personally or by letter, absolutely without charge or cost. Write him in perfect confidence if you do not understand your case and would like his skilled advice and counsel.

Chilkat, with six passengers and a crew of thirteen, capsized on the bar today as she was leaving the harbor on her trip to San Francisco. Four passengers and six of her crew were drowned.

WARREN F. LELAND DEAD.

NEW YORK, April 4.—Warren F. Leland, proprietor of the Windsor hotel, died at Hotel Grenoble this afternoon, following an operation for appendicitis, performed a few days ago.

KILLED BY AN EXPLOSION.

PITTSBURG, Pa., April 4.—Three men were killed today by an explosion at the Railroad cap factory at Braddock, Pa.

WANTED AGENTS.

25 authors. Gen's. Miles, Shafter, Merritt, Wood; Cuban Gen's. Garcia and Palma; Capt's. "Bob" Evans and Taylor; Secretaries Long and Gage; Nelson Dingley; Senators Daniel and Cullum; Hon. Justin McCarthy, M. P.; Gen. O. O. Howard and Stewart L. Woodford and 9 other War Leaders have united to write "The Standard History of the American-Spanish War." The Official History. Not a collection of magazine articles. Each author writes a chapter specially for this book. Finely illustrated. Exclusive territory. Liberal terms. Showing List of Authors sells it.

Address Chas. C. Haskel & Son, Norwich, Ct.

The Way It Happened
 Sympathetic Visitor (to prisoner)—My good man, what brought you here?
 Excited Prisoner—Borrowing money.
 "But they don't put people in prison for borrowing money."
 "Yes, but I had to knock the man down three or four times before he would lend it to me."—Pick-Me-Up.

More Economical Still
 She—I shall be glad to have you call, but come early, as father turns the gas out at 10.
 He—I'm down on the gas worse than the old man. I turn it nearly out as soon as I arrive.

DISCOVERED BY A WOMAN.

Another great discovery has been made, and that too, by a lady in this country. "Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly, and could not sleep. She finally discovered a way to recovery, by purchasing of us a bottle of Dr. King's New Discovery for Consumption, and was so much relieved on taking the first dose, that she slept all night, and with two bottles, has been absolutely cured. Her name is Mrs. L. Thurtell. This was written by Dr. Hannick & Co., of Shelby, N. C. Trial bottle, free at the Globe Grocery Co.'s store. (regular size 50c, and \$1.00. Every bottle guaranteed.)

Relieved in Six Hours

Distressing Kidney and Bladder disease relieved in six hours by "New Great South American Kidney Cure." It is a great surprise on account of its exceeding promptness in relieving pain in bladder, kidneys and back, in male or female. Relieves retention of water almost immediately. If you want quick relief and cure this is the remedy. Sold by George Hill Drug Co., Portsmouth, N. H.

THE NORSEMAN.

First Attempt to Pull Her On the Rocks Was a Failure.

Marblehead, Mass., April 4.—An attempt was made at high water this morning to float the steamer Norseman, ashore on T. H. Moore's Pier, off Marblehead Neck, and tugs succeeded in moving her about 60 feet, but were unable to pull her entirely free, and she remains around shipwreck. Another attempt will be made when the tide is at its height, and it is expected that she will be successfully floated.

As the steamer lies head on to the beach, it is necessary that she be drawn off stern first, and this morning the four tugs, Storm King, Pallas, Vesta and Confidence each drew from a hawser attached to the stern of the steamer. Their efforts succeeded in moving the Norseman from the pier in which she has lain since she went ashore a week ago this morning, but after she had gone about one-sixth of her length, she stuck fast. She could not be started again.

A diver went down during the forenoon and removed a bowlder from a hole in the steamer's bottom, and made a temporary patch by filling the hole with blankets. He could not make a very thorough examination of the hull of the steamer because of the strong undertow, which prevented him from working on the bottom. Soundings are being made in all directions about the present resting place of the vessel, so that a good channel may be found through which to tow her when she is floated.

Those who have charge of the work are sure that the next attempt will be successful, and are confident that when once removed from the rocks the steamer will be kept afloat long enough to permit her to be towed into Marblehead harbor, where she will be tied up in a position that will give the divers plenty of room to work beneath the hull and make temporary repairs.

The water has been cleared from all but the forward compartment, and during the day as much of the water-soaked merchandise in these holds as possible was removed to lighten the steamer and make easier the task of pulling her off the rocks.

STRIKE AT NORWICH.

Norwich, Conn., April 4.—The 1000 odd hands who went on strike at the Pomegranate Mills company's factory in Taftville, yesterday, are still out today, and there is no immediate prospect for the settlement of the disagreement. The spinning department and about 50 of the weavers who were granted the 10 per cent increase yesterday are still at work, but the other departments of the factory are closed down.

Second April.—Revised estimates of election results, based on incomplete returns from nearly all counties in Michigan, place Judge Grant's plurality for supreme court justice at 25,000 in round numbers. He has probably run but little behind the Republican candidates for university regents. Fully two-thirds of the circuit judges elected in the 36 judicial districts of the state are Republicans.

Bouncing the Baby.
 A fond mother once asked the witty Charles Lamb "how he liked baby?"
 The stuttering wit promptly responded: "Boi—boi—boiled, madam!"
 Fortunately for the world, most men and women love babies, and the home that is without one is never truly happy. The old bachelors like Lamb are the only men who do not care for babies, and the woman who hopes to make her husband happy without undergoing the ordeal of maternity, hopes in vain. If women only knew, there is no necessity for dreading the pangs of motherhood. If a woman is really healthy in a vigorous way, her trial will be insignificant. There is one great remedy that prepares a woman for almost painless child-bearing. It is Dr. Pierce's Favorite Prescription. It gives strength, vigor and vitality to the special organs that bear the burden of motherhood. It cures all weakness, inflammation and ulceration. It banishes morning sickness, and other discomforts. It insures a healthy, bouncing baby. Thousands of once barren homes bless this remedy for the innocent laughter of happy childhood. Honest, medicine dealers, tell it and will not substitute some inferior preparation. Read what one woman says:

"I was taken sick two years ago and tried almost everything but could get no help," writes Mrs. T. C. Washfield, of Brimfield, Hampden Co., Mass. "Your Favorite Prescription" did me a great deal of good. I was suffering with falling of the womb and could scarcely walk now I am so much better off that I can walk quite a distance. It was your medicine that helped me. You have me best wishes and thanks, and may God be with you to do all the good for the poor suffering people that you can. If I hear of anybody sick I will recommend them to write to you and will tell what you have done for me!"
 Learn to keep the family healthy by reading Dr. Pierce's Common Sense Medical Adviser. Free in paper-covers, upon receipt of 21 one-cent stamps to cover mailing only, or in cloth-binding 31 stamps. Address, Dr. R. V. Pierce, Buffalo, N. Y.

LELAND MAY DIE.

New York, April 4.—At 7 o'clock this morning the condition of Warren E. Leland, proprietor of the Windsor hotel, was precarious.

Male Sopranos in Rome.
 There is not a single woman's voice in the choir of St. Peter's in Rome, and yet the most difficult oratorios and sacred music ever written are rendered there in such a manner that one might imagine Adeline Patti's high soprano to be leading. There are sixty boys in the choir, and they are trained from the time they get control over their vocal cords. Some of the best singers are little boys.

Man Runs Better Than Animals.

For a short distance a lion or a tiger can outrun a man and can equal the speed of a fast horse; but the animals lose their wind at the end of about half a mile. They have little endurance and are remarkably weak in lung power.

An Exhibition of Great Love

Mamma—So you think George loves you?
 Mildred—Yes; I am sure of it.
 Mamma—What has he ever done to prove it?
 Mildred—The engines and trucks went past here last night, but he didn't care to let go of my hand even long enough to run around the corner and see where the fire was.

A Narrow Escape

First messenger boy: "Wat's der matter, Johnnie, yer walk lame?"
 Second messenger boy: "Matter! It's a wonder Ise not dead!"
 "What happened?"
 "Why, a bloke down de street sent a proposal of marriage by me to de girl's old aunt."—Youkers Statesman.

YOU FEEL CLEAN

After a railway journey, a steamboat trip, or a busy day in the dust and dirt of the city, there is no more grateful luxury than a bath with

FAIRBANK'S FAIRY SOAP

It makes you FEEL CLEAN. It thoroughly cleanses the pores of the skin and gives it a delightful freshness and vigor. It really doubles the good of the bath.

Pure—White—Floating

FAIRY SOAP is made in three convenient sizes—a small size for the toilet, a medium size for the bath, and a large size for the laundry use.

FOR SALE BY

JOHN H. BROUGHTON.

THE DAIRY COW.

How to Judge It and the Way to Keep It in Proper Form.

Form is everything to purpose. Every machine has its specific form, according to its purpose. Students of the cow have gradually come to believe in this theory, as applied to the cow. A dairy cow must have a dairy form. Temperament establishes function and function establishes form. Four animals, a race horse, a dairy cow, a sheep and a goat, are feeding side by side, from the same bale of hay. The horse gallops, the cow milks, the sheep cautions, the goat would gall if it was to become the butt of ridicule. The dairyman must show as much intelligence in dealing with the laws of nature as the hunter, lawyer or merchant does in dealing with the laws of man. Become as little children, teachable.

In judging a cow do not rely too much on the scale of pounds, for it is not correct. There is no straight bar from the horns down in a good dairy cow; there is in a beef cow. In the dairy cow there is a rise of the pelvic arch, a slope of the rump. Breed and feed for these feminine traits; breed for motherhood. The primary consideration is milk, and the breeding of the dairy cow must be treated from that standpoint. The dairy cow has large lungs, larger in fact than the beef cow; a large full eye. The dairy temperament is based on the nervous temperament. The dairy cow has a large amount of nervous force. The eye of a good dairy cow makes a protrusion or "dish" in the face. She has a large brain and powerful backbone, a feminine neck, lean shoulders. The beef cow is a miser, hoarding up its food for flesh. It and the dairy cow are at the parting of the ways. There can be little more in common between them.

I have a two-year-old heifer, a Jersey which has already earned a record of 150 pounds of butter. I am feeding her all the commercial she can eat, to ascertain the point where the food will make beef instead of milk. Consider all these things in breeding. The dairy cow has large open ribs; she is never closely ribbed. The barrel is strong. She has a large spinal marrow, a narrow, rugged back, thin hips, incurving. Nature is our guide, the cow our study if a dairyman succeeds. The giving of milk is a very peculiar function. I believe that the fluid is mainly made at the time of milking. Take a cow with full udders, kill her and dissect her and the sum total of the milk found will not exceed a pint. In the tissues will be found a peculiar milky substance, similar to butter fat. Environment is important; study it. Read and learn about dairy feeding and dairy care. Above all have a clean, healthy stable and pure air.

Actinomyces.
One cannot but be impressed with the large number of cattle afflicted with "lumpy jaw," scientifically known as actinomyces. Whether the meat of animals thus affected will produce the same disease when eaten by human beings is still an open question, but it is a significant fact well known in the East that with the increase in

ACTINOMYCOSIS—LUMPY JAW.
The number of "lumpy jaw" cattle, the disease becomes more common in the human population. It seems reasonable to suggest, from the facts known regarding this disease, that a law be passed preventing the sale of animals thus affected for slaughter purposes. The Bureau of Animal Industry has had marked success in the treatment of the disease by the use of iodine or potassium.

THE PIGGY HOG.

The largest hog ever raised was recently slaughtered in New York. The animal was a Jersey Red boar two and one-half years old, weighing 1,600 pounds, and dressing 1,330 pounds. The National Provisioner has the following to say of the prodigious "This huge swine measured over nine feet from tip of its nose to end of its tail. It measured two and one-half feet across the loins and two and one-half feet across the hams and six feet in girth. This makes the hog three feet through. It is split at the shoulder and to look into the great carcass is like looking into the crevice of a cavern. The carcass spreads across the perspective of the store like a Titanic statue of Pork personified. It also looks like the body of the great hog god embalmed and reposing in its gigantic majesty. From his home to the tip of his snout, the water or weight, gives it value. Some coveys give a large amount of milk, but it will contain but a small proportionate amount of butter or cheese.

Cost of Butter.
Too many who follow dairymaking make the butter cost too much. Improved methods of feeding and management, as well as of manufacture, tend to lessen the cost of production, and with the close competition every item in the cost must be closely looked after. To attempt to follow old lines or methods is to increase the cost to an extent that will leave but little profit.

Vegetables With Flowers.

Gardening and horticulture may go hand in hand, and many gardeners find it quite profitable to give some space in their green houses to the propagation of flowers.

Savage.
"Do you think," asked the Dearest Girl, who likes to stir him up, "that two can live as cheap as one?"
"Meaning marriage?" asked the Savage Bachelor.
"Yes."
"I dunno, I haven't any doubt about my feeling cheaper, though," the Clumsy Equivocal.

ABOUT CAMEMBERT CHEESE.

Origin of the Product and Directions for Its Manufacture.

The Camembert cheese, a well-known article in all French tables and in restaurants, has now been found its way into England, Germany and the Scandinavian countries.

The name of this celebrated product is derived from a village in the department of Orne, France, where, during the great revolution, a woman, Marie Harel by name, first made it. The method remained secret until 1813 when the children of Marie Harel came married and set up small factories in different parts of Normandy. At present there is no secrecy about the Camembert cheese. It is made in the following manner:

Immediately after milking the milk is set in a wooden bucket at a temperature of from 50 to 55 deg. F. In a few hours it is skimmed whereupon a proper amount of rennet is added. The curd is formed after standing six hours, during which the temperature should be as nearly 50 deg. F. as possible, especially at the beginning. In the home cheese manufacture this is effected by placing a wet cloth over the bucket.

When a curd has been formed it should be taken out with a skimmer and placed in a cheese-mold, which stands on a slanting board in order that the whey can drain off completely. In two days the cheese will be ready to leave the form. Each loaf is then salted thoroughly on all sides, whereupon it is left thus for four days, when the drying begins.

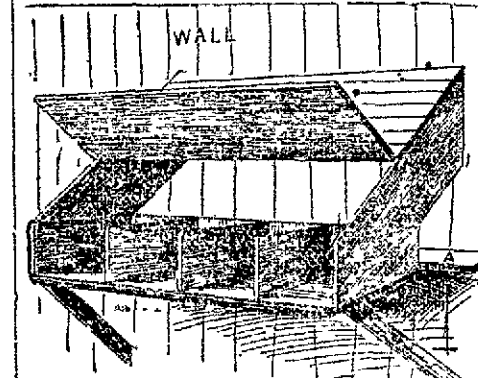

In drying the cheese care should be taken that it is placed where the breeze can touch it directly, such as immediately behind the window screens. They must rest upon straw mats, and be turned from day to day. In the course of five weeks, when sweating sets in, the so-called refining begins. This means that the cheese is placed in a dark, dry cellar without ventilation, and where a temperature of 50 deg. F. is kept as nearly as possible. They must be turned every other day for about a month, and they are then ready for marketing.

This is the salted Camembert. It can be made without salting, but in that case will keep only a short time before decaying.

A good Camembert is quite palatable. But here, as in many other cases, success lies in the touch with which it is done.—Farm and Fireside.

Frog Raising.
The natural abode of the frog is swamps or low lying land, where, if natural breeding is permitted to proceed unmolested, they will increase very rapidly. But the great menace to such propagation is the attack made upon them by wild and domestic animals, birds of various descriptions—to say nothing of boys. The spawn which is hatched by the warmth of the sun, has also to be guarded carefully, as otherwise it will be eaten by the small creeping animals which frequent such places. To overcome both difficulties, it is necessary to fence in the pond, cover it completely with wire netting, more or less expensive, depending upon the size of the breeding pond. With these precautions the propagation will be very rapid, and at three years of age the frogs will be of marketable size.—Country Gentleman.

Nests for Laying Hens.
The accompanying plan for nest boxes, the idea is to build the box against the side wall or end of the henhouse. The nests are 12 inches square and 9 inches deep, with the back and sides nailed fast to the bottom, the front board being removable so that the boxes may be easily cleaned. (This front board is not shown in the cut, so that the interior arrangement could be plainly outlined. The cover of the box is of thin stuff, with a slant of 50 degrees. The lid is 20 inches wide and strongly hinged and closed.

At the back of the nests there is a four-inch walk (see A. in cut), extending out from the box one foot, for the hens to fly up on. There is a two-inch space at each side of the walk. The nest can be fastened up two feet from the floor for Leghorns, and does not take up any floor space whatever.—Reliable Poultry Journal.

Quality of Milk.
Butter quality in milk is a certain indicator of its actual value for manufacturing purposes. The water or weight, gives it value. Some coveys give a large amount of milk, but it will contain but a small proportionate amount of butter or cheese.

Soft Butter.
One cause for soft butter is in keeping the cream too long before churning and not stirring sufficiently through each time fresh cream is added. First-class butter cannot be made from cream that has become sour. Another cause is that the churning is kept up too long. When the churn is stopped as soon as the butter assumes the granular stage and is worked in salt brine every particle of the butter comes in direct contact with the brine, which hardens it and at the same time removes the buttermilk and cheesy matter from it, so that the butter is not only firmer but keeps better.

The Separator.
Where a market can be had for sweet skimmed milk the separator can always be used to a good advantage, as with it in a very few minutes after the milk is drawn the cream is taken out of it and the milk is ready for market, and can nearly always be used to better advantage by the consumer.

Evidence of Affection.
Geraldine—You have been sick, haven't you?
Gerald—Yes, I was threatened with brain fever.
Geraldine—Well, you had one comforting thought, you couldn't have it in anything but a mild form.—Town Topics.

RAISING SQUABS.

Advice for Selection of the Birds and Directions for their Manipulation.

The best pigeons for raising squabs are a cross between the rock and the common pigeon. When these are not readily obtainable the best best are the common ones. The white ones are preferable to the blue, for the reason that the squabs bring higher prices usually, but otherwise one is as good as another. Squabs should be killed just as they are ready to leave the nest. At this time they are fatter, heavier and tender than at any other. They are killed by holding in the mouth and usually sold unpecked and undrawn.

As the birds pair, it is necessary to have as many males as females in order to prevent constant quarreling and each pair of birds should have a separate nesting place.

One of the best ways of providing for this is to put up a row of shelves and divide them into apartments not less than a foot square. Half of the open space should be covered with a board to shelter the nests from the light.

A setting of eggs will be laid and hatched every month, except February. This is the pairing month.

The best plan of feeding is in troughs or hoppers, always feeding liberally. Grain, peas, wheat and corn make a good ration, the corn always, corn alone is too fattening. Provide plenty of pure fresh water where they can help themselves. Cleanliness is essential to health.

Orchard and Garden.
In transplanting cut off all broken or mutilated roots.

In mulching, use material that is free as possible from weed seeds.

The best apples are grown in a hilly country and a somewhat rocky soil.

The only objection to low-headed trees is that they interfere with cultivation.

Planting a few trees every fall or spring as may be convenient keeps up the supply of fruit.

A mound of earth raised around each tree should never be omitted in the fall transplanting.

In growing fruit for market it is an advantage to have varieties that will keep well and bear transportation.

Save up all of the ashes during the winter to use as a top dressing in the garden next spring.

A good tree taken up and well planted will do equally well whether transplanted in the spring or in the fall.

One decided advantage in fall planting is that the tree is in place ready to grow as soon as the season opens in the spring.

Rhubarb starts to grow so early in the spring that fall setting will nearly always be found advisable.

While lilies and gladioli are injured by manuring, tulips, hyacinths and crocuses are benefited by a liberal allowance.

Long stable manure makes a good mulch for the strawberry bed, but the objection is that it contains too many weed seeds.

The great value of grafting and budding is that when a choice fruit is obtained it may be continued in all of its excellencies.

The first six or seven years in the life of a fruit tree are usually spent best in growth. Too early fruit bearing is injurious.

If proper work in pruning is done at the time of planting the tree and for the next few years, the fruiting power or labor will be needed afterwards.

Plant Pests.
There are few pests on window or greenhouse plants that give more trouble than the two or three species of scale to which they are liable. The latter multiply and develop with astonishing rapidity and are very inimical to the vigor and beauty of both woody and soft-textured plants.

On the former they can be successfully treated with kerosene emulsion or strong whale oil soap suds; but on begonias and other juicy leaved varieties there is no alternative except the slow process of carefully rubbing them off with a cloth or soft brush. They should be gone over in this way at least every three or four weeks.

Such plants as are treated with kerosene emulsion or whale oil soap, will need rinsing with clear tepid water in about an hour after the application of the insecticide, and should not be exposed to strong sunlight until dry.

The Apple as Medicine.
The apple is such a common fruit that few persons are familiar with its remarkable medicinal properties. Everybody ought to know that the very best thing he can do is to eat apples just before going to bed. The apple is excellent brain food, because it has more phosphoric acid, is easily digestible shape, than any other fruit known. It excites the action of the liver, promotes sound and healthy sleep, and thoroughly disinfects the mouth. It also stimulates the surplus acids of the stomach, helps the kidney secretion and prevents calcareous growth, while it obviates indigestion and is one of the best preventives of disease of the throat. Next to lemon and orange, it is also the best antidote for the thirst and craving of persons addicted to the alcohol and opium habit.

The Separator.
Where a market can be had for sweet skimmed milk the separator can always be used to a good advantage, as with it in a very few minutes after the milk is drawn the cream is taken out of it and the milk is ready for market, and can nearly always be used to better advantage by the consumer.

Soft Butter.
One cause for soft butter is in keeping the cream too long before churning and not stirring sufficiently through each time fresh cream is added. First-class butter cannot be made from cream that has become sour. Another cause is that the churning is kept up too long. When the churn is stopped as soon as the butter assumes the granular stage and is worked in salt brine every particle of the butter comes in direct contact with the brine, which hardens it and at the same time removes the buttermilk and cheesy matter from it, so that the butter is not only firmer but keeps better.

PORTO RICO'S BRIGANDS.

A Band That Has Been Abolished Since the American Occupation.

The death knell of brigandage in Porto Rico was sounded when the American troops landed at Guanahua to that time brigands and been as alive. Now, too, if any remain, since early last January there has been no indication whatever of their existence and the band that made a manifestation then was believed to be the only one that had not yet quit business. Its experience on that occasion was such as to discourage it. The brigands had no sooner begun operations than word was sent to the military post at Arecibo about them.

A column of sharpshooters was immediately detailed to look after them. The soldiers soon came up with them and opened fire. The brigands were far in advance at the time and were mounted on the swift-footed little mountain ponies which Porto Rico produces. They therefore, escaped, but the incident opened their eyes to the fact that American troops have a different and far more unpleasant way of dealing with such things than the old Spanish civil guard.

Prior to this, from the beginning of the American occupation, there had been few and poorly organized raids. Indeed, it long ago became evident that the great leaders or captains of the bandits of Porto Rico had forsaken the cause. The overthrow of Spanish sovereignty was sufficient to rid the island of them. At the coming of the American troops they dug up their gold and silver and other valuables and fled from the island. There are holes to be seen in the ground and mounds where holes have been dug and then refilled near some caves in the Ponce district, the former hotbed of Porto Rican brigandage, and the country people say that at these spots was hidden the plunder of these outlaws prior to the American invasion.

They were brigands in every sense of the word, not merely petty malefactors, but robbers, kidnappers, cut-throats and footpads. They waylaid travelers, levied blackmail on planters, looted homes, killed for pay and even made descents upon villages for booty. Some of them made a specialty of removing hated persons, receiving for their services from \$100 to \$500, according to the financial ability of the person hiring them and the prominence of the intended victim or his fighting ability. The people of Porto Rico to-day with a certain pride that these cut-throats never betrayed a patron. The two most famous leaders in the business up to the time of the American capture of the island were Pan Blanco, or "White Bread," and Aguilá Blanca, or "White Eagle."

When the city of Ponce fell into the hands of the American troops Pan Blanco fled incontinently. His record was so bad that he could expect no mercy. Aguilá Blanca stood his ground and decided to see what the Americans were like. The result of the scrutiny was favorable, so he came into the city, said he wanted to lead a better life and would reform if the Americans would permit him, and asked for and received a sort of safe conduct.

Aguilá Blanca's life is exemplary, fully justifying the safe conduct which General Henry gave him. When Aguilá Blanca asked for it he wrote that he had been a man of the woods out of undying, implacable hatred for Spaniards; and now that they had been driven from the island he had no further incentive to war against authority, and, therefore, he desired to return to civilized life and be a law-abiding citizen of his beloved native island.

Horse-Breeding in England.
Some idea of the attention paid in England to the breeding of the useful horse as distinguished from the animal used for racing may be gained from the fact that at the recent London show of the Shire Horse Society the total value of the cash prizes for excellence in this breed alone aggregated \$1,227. There were seven classes for stallions, six for mares, and two for geldings, and there were a number of cups and special prizes as well. There are also breeders' prizes, thirteen in number, for stallions and mares, and two for geldings, with first prizes of £10 in each. This is certainly an incentive for farmers to raise strong and sound draught horses, and an example that it would be well to follow in this country.

The East Indian Dugong.
A writer in Cosmos, M. Emilio Mason, argues that the East Indian dugong or manatee is the natural foundation for the myths of sirens, mermaids, and tritons. A female dugong recently captured in the Red Sea has a head and bust which, when seen at some little distance, might be taken for a mermaid. The manatee has also a vibrant moan and these two combined make a good base for the theory which the writer has advanced with a good deal of elaboration.

Villany Confounded.
In her agony the miserable woman sent her hated rival by post a can of corned beef containing arsenic. The latter, being passionately fond of food partook of the beef. Thereupon her complexion was much beautified.

Here again we have villainy confounded by what some people are pleased to term fortuitous circumstances.—Detroit Journal.

Roast Beef and Beer Germs.
Messrs. Doerners and Von Knebsch, in Germany, have been investigating the action of the Roetgen rays upon germs contained in beer, and claim that the assumption that the germs which were not destroyed being to another variety with a stronger resisting power, to be without foundation, but that it is nevertheless, proven that germs suspended in beer may be annihilated by the rays.

A Few Truths.
Too often we mistake companions for friends.
Talent teaches us what to do—tact tells us what not to do.

The Long-suffering Worm Will Turn.
The long-suffering worm will turn, but it sometimes is crushed in the effort.

It is a long-sighted bachelor who gives a baby something its mother can use.

The only evidence of good taste some men show is in their selection of their wives.

JUST LIKE A MAN.

Took Advantage of His Wife's Absence To Clean His Bike in the Kitchen.

"Pa took his wheel all to pieces yesterday," said Johnnie, "an' fixed it all up good. Ma was off over to the city, so pa washed the kitchen."

"I told him I guessed ma would be mad 'cause she'd just got it all cleaned up, but she said she couldn't help it if she was mad, he'd got to have some place to do it in. He got a nice big piece of cloth an' went to work. Pa used a pile of oil on his wheel an' there was an awful lot of drops got on the floor, an' he spilled 'most a cup of kerosene, too, but he sopped it all up with his rag, an' he said it would be all dried up by the time ma got home, but I want, just the same."

"He got it 'most done when ma come, an' you'd just ought to see how mad she was. She called him 'John Henry,' an' she's always awful mad when she calls him that, an' she hollered like everything when she seen the rag he was usin'." She said it was one of her best pillow shams.

"Pa said it was full o' holes anyway, and ma said 't'waint holes, 't'waint open work, an' pa said all the holes he ever seen was open work. An' he said he hadn't hurt the old thing anyway, 'cause she could wash it right out."

"An' ma said the grease and black on that sham wouldn't never come out in the Lord's world, an' she said if pa ever fixed his old machine in her kitchen again, she'd burn the thing up. She said 't'would take her a week scrubbin' an' scourin' to get the oil an' grease out o' the kitchen floor, an' she said she wouldn't slave so for no man livin'." She said if the wood shed wasn't good enuf for such nasty work he could do it out in the yard, but if he ever did it in the kitchen' agin she'd make him sorry for it.

"Pa said he didn't doubt 't' all, an' then he went off to ride an' ma went to cleanin' up the kitchen."

"But pa got his wheel fixed up awful good, all the same."

Street Car Driver's Philosophy.

"It's not so easy as you'd s'pose," remarked the driver with a jerk of the reins and a chuck that urged his team to a livelier pace. "These car horses has all the feelings of any other kind of a horse. They has to get use to their work, an' you'd be s'prised to see how the young ones 'll shy at a switch."

"The car just then approached a parting of tracks. Apparently there was no suggestion by reins or voice. The horses of their own accord bore off sharply to one side. There was a musical clanking of iron as the hoofs of the outside horse struck a metal plate in the pavement. Then horses and car proceeded on their appointed way."

"That's the way the old ones does it," commented the driver. "They know what they're up to. But sometimes a green horse can't be made to take the switch as he should. He'll shy and dance around it, like it was a hole in a bridge, an' you've got to eddicate him to it."

"How do we learn him wot to do? We hitch him up along of an old reliable that knows the trick an' will crowd him out onto the switch place every time. The youngster 'll start an' jump an' either tremble or try to run. But somehow, after awhile, he comes to understand that it's all right, an' there you are. No more swearin' and pullin' the reins for you. The animal'd rather take the switch than not. It's a change from the plain tracks an' I s'pose it occupies his mind."

Stated in a Sentence.
The game of chess is taught in all the Austrian schools.

Bank of England notes are numbered backward—from 10,000, hence the figures 000,01.

One out of every six inhabitants in France has an account at the state savings banks.

The customs authorities have decided that the Chinese tom-tom is a musical instrument.

There are said to be fewer suicides among miners than among any other class of workmen.

The average length of human life in the sixteenth century was only eighteen to twenty years.

Thirty million oysters are annually sent to England from the basin of Archachon, in the Bay of Biscay.

A single plate of armor for the turret of the battleship Kearsarge weighed thirty-three and one-third tons.

It takes, it is said the tasks of 75,000 elephants a year to supply the world's piano keys, billiard balls and knife handles.

The moon revolves from one point in the heavens to the same point in twenty-seven days, seven hours and forty-three minutes.

PARISH MEETING.

At the annual parish meeting of St.
John's church, held on Monday after-
noon, the following officers were elected
for the ensuing year:

Wardens, Robert King, George D.
Marcy;
Vestrymen, Moses H. Goodrich, John
Hatch, Stephen Deatur, William A.
Peirce, A. C. Heffenger, George B.
French, Timothy A. Tucker, William
P. Walker, Frank J. Philbrick, Charles
C. Hall, J. Louis Harris, Francis E.
Langdon;
Parish Clerk, Samuel B. Gardner;
Treasurer, John Hatch;
Auditors, William A. Peirce, Charles
C. Hall;
Delegates to Diocesan Convention,
John Hatch, Robert King, J. Louis
Harris, P. F. Harrington.

OBSEQUES.

The funeral services over the remains
of Mrs. Loris Williams were held at
the home of her son-in-law, Horace
Pettigrew, on Tuesday afternoon at two
o'clock. Rev. William Warren, pastor
of Trinity Methodist church, officiated,
and the interment was in Sagamore
cemetery.

The funeral services of William B.
Colley were held from his late residence
on Austin street on Tuesday afternoon
at half-past two o'clock. Rev. Robert
L. Dunton, pastor of the Free Will Baptist
church, officiated, and interment
was in Harmony Grove cemetery.

ELECTION OF OFFICERS.

At the semi-annual meeting of the
Warner club held on Tuesday evening,
the following officers were elected for
the ensuing term:

President, Henry Locke;
Vice President, Ernest R. Oldfield;
Secretary, Geo. H. Young;
Treasurer, C. Wm. Taylor, Jr.;
Directors, W. E. Drake, W. Harry
Chick, E. F. Rowe, Henry Locke, E. R.
Oldfield.

The club is in a most flourishing con-
dition, and is rapidly increasing in
membership.

"TO ERR IS HUMAN."

People like to talk about attractive
things in advertising. In a company
recently the proverb above quoted, and
which appeared at the head of one of
a well constructed series of advertisements
of Hood's Sarsaparilla, was so much
discussed that we doubt if any one there
will ever forget the source whence it
came. Messrs. Hood & Co., are using
these proverb advertisements on a very
broad scale, and they are attracting dis-
cussion and favorable comment every-
where.

ANNOUNCEMENT.

Today, and every day next week, our
advertisers, the Globe Grocery
Co., will sell you a box of Bucklen's
Arnica Salve, "The Best Salve in the
World," and guarantee it to cure Cuts,
Bruises, Sores, Ulcers, Salt Rheum,
Fever Sores, Tetters, Chapped Hands,
Chilblains, Corns and all Skin Eruptions,
and positively cures Piles or
money refunded.

H. E. BUCKLEN & CO.,
Chicago, Ill.

DANCING PARTY.

A very enjoyable dancing party was
given in Conservatory hall on Tuesday
evening, under the management of
Messrs. Percy Frye and Harry Woods.
A good crowd was in attendance and a
very pleasant evening passed.

ADJOURNED ONE WEEK.

The annual parish meeting of Christ
church parish was held at the church
Monday evening. There was a large at-
tendance, and much enthusiasm was
shown. Owing to the very large
amount of business to be transacted the
meeting was adjourned for one week.

IMPRESSIVE CEREMONY.

Funeral of Rear Admiral Carpenter.
Held at 12 o'clock, noon, today.

The funeral of Rear Admiral Carpen-
ter was held from the St. John's church
at 12 o'clock, noon, today and the his-
toric edifice was crowded to the doors
and many were unable to gain entrance
to pay their last sad respects to the de-
ceased.

The body arrived in town on the 9:45
train from Boston and was at once taken
to the family residence on Middle street
at 11:30 o'clock the handsome broad
cloth casket with its plain silver trim-
mings was taken to old St. John's
church where the friends of the beloved
admiral had already commenced to as-
semble.

A battalion of marines from the navy
command in command of Lieut. Col. Robert
A. Meade and Captain T. H. Low came
over on the regular 11:30 boat and
marched to the church where they were
placed as guard over the remains. A
special boat at 11:45 brought over the
officers of the yard and their families.

When the impressive ceremonies com-
menced at 12 o'clock the church was
filled with the best people of the town,
all anxious to do homage to he who in
life had always a kind word for all. Rev.
Henry E. Hovey, a life long friend of
the dead admiral, was much affected
and his eulogy of the deceased was feel-
ingly uttered. Never before had the
reverend uttered such a sad service to per-
form.

The floral tributes came from far and
near and the casket and immediate vi-
cinity was a perfect field of choice and
rare flowers. Eight members of the
crew of the U. S. S. Piscataqua in
charge of Mate J. L. Vennard, officiated
as pall bearers. The body was placed in
the receiving tomb to await interment.
The following officers from the yard
were present besides delegations of
Clerks and foremen; Rear Admiral
George C. Remy, Pay Director Henry
Denniston, Commander E. T. Strong,
Pay Inspector Joseph H. Foster, Cap-
tain William Harris, Surgeon E. Z.
Derr, Carpenter J. B. Fletcher.

Notes.

The flag on the U. S. S. Piscataqua
was at half mast during the day in
honor of the late Rear Admiral Carpen-
ter, U. S. N.

The large floral anchor from the clerks
and foremen of the navy yard was a
beauty.

A delegation arrived from the Boston
navy yard to attend the funeral.

Rear Admiral Remy, U. S. N.,
rendered all possible aid in the funeral
arrangements.

A large number of telegrams have
been poured into the Carpenter family
since the death of the distinguished ad-
miral, conveying words of sympathy
from far and near.

The news of the admiral's death
caused deep regret in many foreign
cities, where he was well and favorably
known.

Captain Mortimer L. Johnston, Com-
mander of the Boston navy yard, came
down to attend the funeral.

The honorary pall bearers were Rear
Admiral George C. Remy, U. S. N.,
Captain F. F. Harrington, U. S. N.,
Pay Director Henry M. Denniston, U.
S. N., Commander E. T. Strong U. S.
N., Surgeon E. B. Derr, U. S. N., Pay
Inspector Joseph Foster, U. S. N.

The remains were escorted to the
tomb by the battalion of marines.

A TOUGH YOUNGSTER.

Knocked Down by a Horse and Then
Run Over by the Carriage.

A young son of Oren Dowas was
knocked down and run over by a pass-
ing team on South Mill bridge last
evening. The youngster was playing with
his mates and ran directly in front of an
approaching team. The animal's knee
struck the boy in the head and knocked
him flat. Before the driver could rein
in the horse both wheels of the carriage
had passed over the prostrate young-
ster.

The spectators were horrified and
picked the boy up for dead. He quick-
ly dispelled the illusion however and
awoke the echoes with his bawling.
Beyond a bump on his head and the
skin scraped from his body in several
places the youngster escaped unhurt.
It is said that he has been run over
several times and experienced a number
of other accidents but is still on deck with
unbroken limbs.

BROTHER FOR BROTHER.

"Brother for Brother" the great Eng-
lish drama which is soon to be seen here
comes bearing the stamp of highest ap-
proval of the best critics of New York
and Boston. The same faultless cast
that interpreted the piece in those fastid-
ious cities will present the play here.
It numbers among its members Miss
Elizabeth Rathburn, Kathburn,
Kathryn Angus, Nellie Mackrell, Mabel
Elliott and Messrs Wilbur Hudson, J. H.
Smiley, Wm. H. Harvey, Joseph H.
Zahner, Tom Ripley and H. C. O'Brien.
At Music hall, April 11.

CITY BRIEFS.

The woman who'd wear trousers
Should never wed at all.
—The man who wears a slawl.
—Detroit Journal.

And now the bicycles will have their
comings.

A year ago early planting had been
done by this time.

The Portsmouth and Exeter bowlers
meet here this evening.

A local cycle dealer has taken orders
for thirteen chainless wheels so far this
season.

The first apple blossom of the season
is still nothing more than a bit of imagi-
nation.

The wheelmen are beginning to get
their wheels out, several being seen on
the streets today.

The "S. G." Londres is made of the
choicest stock and is the best ten cent
cigar in the market.

Tonight the ladies of Star lodge, I.
O. of U. O. L., hold the last of their
popular series of whist parties.

Have your shoes repaired by John W.
Mott, 34 Congress street. Satisfaction
guaranteed. Hand sewed work a spec-
ialty.

Soon a cry will go up for the presence
of the street sprinklers to lay the flying
dust.

H. Fisher Eldredge purchased one of
the private boxes for the coming horse
show in Boston, paying \$195 for the
same.

The April session of the supreme
court will convene Tuesday next in Ex-
eter with Judge William N. Chase pre-
siding.

Mayor Page has been invited to be
present at the meeting and banquet of
the Jefferson club in Manchester on the
13th inst.

of company A have been invited to be
present at the grand military ball on the
14th inst.

The letter carriers' association of
southern New Hampshire and Massa-
chusetts will hold its annual field day in
Dover, June 25.

Mr. B. F. Gardner's rough coated St.
Bernard dog, Richard III, won an "B.
C." in Class 11 on the dogs of this
breed in the Boston dog show on Tues-
day.

Mr. H. S. Cotton of this city goes to
Boston today to attend the annual meet-
ing of the grand lodge of Pilgrim
Fathers as a delegate from the Far-
mington colony.

Trout fishing enthusiasts are endur-
ing the torments of Tantalus just now.
The season is "open" and they are anx-
ious to fish, but the brooks are all tight-
ly closed with ice.

Mr. A. T. Thoit, formerly of Port-
land, and now publisher of the Duluth
(Minn.) News Tribune, is visiting in the
East, having arrived in Boston with a
newspaper excursion.

Davis and William T. Keogh's "Brother
for Brother" company, was in town to-
day making arrangements for the pro-
duction of the play in this city on the
evening of April 13.

Spring and Summer Mill-
nery Opening at Mrs. B. F.
Lombard's, Friday and Satur-
day, April 7 and 8. All ladies
invited to inspect her fine line
of Trimmed Goods. No. 11
Vaugan Street.

STOLE FROM HIS EMPLOYERS.

Ernest Bram, aged twenty-six years,
a fireman on the ferryboat Newmarket,
was arrested on Tuesday afternoon for
the larceny of twenty-six dollars from
the ticket office of the Portsmouth, Kit-
tery and York electric road. Bram at
first denied taking the money but at
last confessed to Marshal Entwistle that
he hid and handed over the amount.
He was placed in a cell and will be ar-
raigned in police court today.

Bram in stealing the money, waited
until Mr. Bicknell, the treasurer of the
company, left the ticket office at noon
for lunch. He said he found the door
open but it is thought he either forced
the door open or had a duplicate key.
Suspicion at once pointed to Bram as
he was the only one seen around the
place while Mr. Bicknell was away.

LADIES' DAY AT THE ATHLETIC CLUB.

Today is ladies' day at the Ports-
mouth Athletic club and the boys will
lay themselves out to entertain their
fair friends. The club house will be
thrown open to them during the after-
noon, and in the evening at Fairro hall
dancing will be the card. Conservatory
orchestra will furnish the music.

for Boston on Tuesday morning on
business and pleasure. Mr. Clough re-
mains over today, Wednesday, in order
to attend the annual session of the order
of Pilgrim Fathers, to which he is a
delegate.

ALL FLAGS AT HALF MAST.

The president has ordered that on
Thursday, April 6, the national ensign
be displayed at half-mast on all public
buildings, forts, camps and public res-
sels of the United States. It would
seem to be in order for our citizens who
own flags to display them on that day
and that those belonging to our public
schools be also displayed.

It's the little colds that grow into big
colds; the big colds that end in con-
sumption and death. Watch the little
colds. Dr. Wood's Norway Pine Syrup.

MONTHLY MEETINGS.

Warwick Club.

The regular monthly meeting of the
Warwick club was held on Tuesday
evening. A number of applications for
membership were acted upon and the
regular routine business transacted.

Portsmouth Medical Society.

The monthly meeting of the Ports-
mouth Medical society was held at Dr.
William O. Jenkins office on Thursday
evening.

Portsmouth Cycle Club.

Tuesday evening was the regular
monthly meeting night of the Ports-
mouth Cycle club, but owing to the lack
of a quorum it was adjourned for one
week.

"Laugh Out, Oh,
Murmuring Spring."

It is the time to laugh; for
it is the year's fresh prime; all
nature is purified and ready
for a carnival of growth.

Sensible people now do the
same that nature does—aim
to be purified, and for the
same reasons. They use that
marvelous blood purifier,
Hood's Sarsaparilla, that
never disappoints.

Its work and worth are known world
wide as a household medicine.

Nausea—"Vomiting spells, dizziness
and prostration troubled me for years.
Had neuralgia, grew weak and could not
sleep. My age was against me, but Hood's
Sarsaparilla cured me thoroughly. My
weight increased from 125 to 145 pounds. I
am the mother of nine children. Never felt
so well and strong since I was married as I
do now." Mrs. M. A. WATERS, 1233 3rd St.,
Washington, D. C.

Pimples—"Headaches, nose bleed and
pimples made me so weak that I could not
work. Hood's Sarsaparilla gave me good
sleep, strength, and cured me." A. E. HARRIS,
M. E. HENRY, 1941 West Fayette Street,
Syracuse, N. Y.

Eczema—"We had to tie the hands of
our two year old son on account of eczema
on face and limbs. No medicine even
helped until we used Hood's Sarsaparilla,
which soon cured." Mrs. A. VAN WYCK, 123
Montgomery Street, Paterson, N. J.

Dyspepsia—"Suffered everything but
death for years with dyspepsia. Nothing
relieved me until I took Hood's Sarsapa-
rilla and it made and kept me well. Can
eat anything I wish." Mrs. EUGENE
MURPHY, Hull's Mill, Danbury, Conn.

Running Sores—"After worrying four
months I gave my children Hood's Sarsa-
parilla and it cured them of running sores.
Hood's Pills cured me of dyspepsia and
constipation." Mrs. KATE
